

REQUEST FOR HPV TESTING AND/OR GENOTYPING

The Aptima HPV assay is available to help determine your patient's risk of developing cervical dysplasia/carcinoma. Physicians Laboratory can perform HPV testing on-site if this patient's Pap test was submitted in a ThinPrep vial. There is no need to call the patient back for another collection. We will retain the ThinPrep vial for three weeks from the time it was collected. Please fill out the information below, check the appropriate test(s) and fax to Physicians Laboratory at 605-322-7222. Be sure to include the patient's diagnosis and your signature. These tests cannot be performed without your signature.

Patient Name: _____
